📍 Santa Rosa, Laguna Philippines

Summary

Results-driven Full Stack Developer with a proven track record of building **high-performance** web applications and **scalable backend services**.

Experienced in optimizing system performance, reducing deployment time through **CI/CD automation**, and delivering features that improve user engagement and business outcomes.

Skilled in **React.js**, **Next.js**, **Node.js**, **TypeScript**, **PostgreSQL**, and modern development practices, with experience mentoring developers and contributing to successful product growth.

Professional Experience

01/2024 – 06/2026
Boston

WEVO Conversion
Software Engineer

- Developed and maintained a high-traffic customer web platform using **React**, **Next.js** and **TypeScript**, implemented **server-side rendering** and **code-splitting** to improve load performance and reduce bundle size.
- Built and optimized **Node.js** APIs and **Postgres/SupaBase** queries, introducing caching and query tuning that reduced average API response time by **40%** and increased throughput by **35%**.
- Led **CI/CD** implementation with **GitHub** Actions and containerized pipelines, cutting deployment time to under **15 minutes** and enabling daily releases with automated rollback.
- Implemented unit and integration test suites and established code-review standards; mentored 3–4 junior developers, which helped reduce production bugs by **~30%**.
- Delivered **8+** major features during tenure through close collaboration with product and design, driving a **22%** increase in user engagement and improving accessibility and UI consistency.

02/2022 – 01/2024
Pasig City

Xentra Solutions
Web Developer

- Built responsive front-end experiences using **React** and modern **JavaScript**, and delivered **WordPress** projects for marketing teams; improved **page load performance** by **~25%** and enhanced mobile UX.
- Integrated **RESTful APIs** and **third-party services**, implementing client-side caching and efficient **SupaBase** queries to speed up data retrieval and reduce server load.
- Migrated legacy pages to a modern stack, implemented accessibility and **SEO** best practices, contributing to an **~18%** increase in organic traffic.
- Collaborated with designers and product managers to ship **10+** features; maintained documentation, conducted code reviews, and mentored junior team members and interns.

07/2020 – 12/2021
Bacoar

Intelliquick
Frontend Developer

- Worked with **PHP** and **Laravel** to build simple backend features and handle data

- Converted UI/UX mockups to **React** screens and components with Bootstrap and Tailwind CSS.
- Worked with **React** and **Node.js** to build simple frontend and backend features and handle data.
- Developed three mobile with **iOS** and Java consumer apps (**native**, **Swift**) in the mindfulness space.
- Switched the backend from **MySQL** to **MongoDB** to improve scalability and performance as user data and transactions grew.
- Assisted with system migration and infrastructure enhancement projects.
- Created reusable frontend components and backend modules for internal enterprise tools.
- Worked with **cloud-hosted databases** and services to improve scalability and reliability.
- Participated in troubleshooting, bug fixing, and enhancement delivery for production systems.
- Collaborated with cross-functional teams to ensure successful delivery of technical solutions.

Education

04/2016 – 05/2020
Cebu City

Bachelor's degree of Computer Science

University of the Visayas

- Graduated with High Honors
- Dean's Lister
- Outstanding Capstone Project Award

Skills
